

# Certificate of Analysis

1.05450.0000 Nutrient agar for microbiology  
Batch VM984550

## Batch Values

|                                          |           |
|------------------------------------------|-----------|
| Appearance                               |           |
| clearness                                | clear     |
| colour                                   | yellowish |
| pH-value (25 °C)                         | 6.9       |
| Solidification behaviour (2 hrs., 45 °C) | liquid    |

## Batch Values

|                                   |     |   |
|-----------------------------------|-----|---|
| Recovery rate                     |     |   |
| Staphylococcus aureus ATCC 25923  | 96  | % |
| Listeria monocytogenes ATCC 19118 | 103 | % |
| Escherichia coli ATCC 25922       | 78  | % |
| Salmonella typhimurium ATCC 14028 | 109 | % |
| Pseudomonas aeruginosa ATCC 27853 | 89  | % |
| Bacillus cereus ATCC 11778        | 117 | % |
| Yersinia enterocolitica ATCC 9610 | 83  | % |

*Incubation: 24 hrs.; 35 °C aerobic; Listeria up to 48 hrs.; Yersinia 24 hrs. at 30 °C.*
